PROJECT DETAILS

Project: Learning Management System (LMS)
Role: Software Developer
Team Size: 08

Description:

     Learning Management System is designed to track the training of the employee. This project consists of the training allocation as individual or in group. User will be notified time to time about completion of the training. On completion of training employee will receive the certificate.

LMS also helps to rate the training or trainer based on the performance. Technical Discussion Forum is a part of LMS which helps to resolve the blocker/issues faced by individual/team.

They will collaborate together and work on the resolution or technical knowledge sharing. Web App for front-end is implemented by using React JS with React Hooks, Redux, HTML5, CSS, Bootstraps, Material UI.

RESPONSIBILITY

- UI development by using React JS.
- Responsive web design by using React Bootstrap, HTML5, CSS3.
- Highly complex components by using designing React with minimum usage of third party NPM packages.
- Designing and using dynamic and reusable components.
- Implementation of connectivity with API services by using axios or fetch.
- Pushing and pulling code to GitHub repo.
- Design and develop static or dynamic components based on the requirements from product owner. Other projects To-do-List, Calculator, Є-commerce App.

I hereby declare that the above information is true to best of my knowledge.
